

# Risk Assessment - Video CPD

Good care practice must be person-centred and this includes risk assessment and management. Everyone is entitled to make choices, and be as independent as possible regardless of age, disability or condition. Risk enablement is taking a positive approach rather than a negative one. The assessment begins with 'what can be done' rather than 'what can't be done'.

## Learning Outcomes

- •What is risk?
- •Positive risk management
- •Person-centred approach to risk management
- •Principles for person-centred practice
- •Risk enablement and dementia
- •Legislation and policies
- •What happens if something goes wrong?
- •Support plans
- •Record keeping
